

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Think like a criminal to fight food fraud

Ensuring food is safely produced, transported and consumed is a shared responsibility – our assessment tool is just one part of that solution, by helping you get into the minds of fraudsters.

It's a science-based tool, based on the study of criminal behaviour and rational decision making. Structured into two parts, the first part pinpoints the elements affecting criminal behaviour, while the second part relates to your company and its external relationships and environment (such as suppliers).

The assessment is easy to use and can be applied anywhere in the food supply chain, from animal feed and primary production to manufacturing and catering. It applies fraud theory to expose the identified areas of vulnerability in the food supply chain.

There are three main elements – opportunities, motivations and deterrents of food fraud – that our tool helps to identify. Our tool helps to identify a company's vulnerability to food fraud, which makes up the focus of our food fraud vulnerability assessment.

The assessment is easy to use and can be applied anywhere in the food supply chain, from animal feed and primary production to manufacturing and catering.
