#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Proceed to the next set of steps to rinse and hydrate the Quantum Cartridge.

Rinsing and Hydrating

The Quantum Cartridge, when newly installed, needs to be flushed and allowed to hydrate. This ensures optimal water quality. At this time, the Tank needs to have at least 20 Liters of water.

Step	Action	Result
1	Locate the clear tubing and the barbed fitting from the Milli-Q System Accessories Bag.	picture here of these items.
2	Screw the barbed fitting onto the Q-POD Dispenser. Note: Do not use any white tape on the threads of the barbed fitting. An O-ring is located inside the Q-POD Dispenser.	picture here showing the barbed fitting installed on the end of the Q-POD Dispenser.
3	Flush one end of the clear tubing onto the end of the barbed fitting. Place the other end of the clear tubing into a sink.	picture here showing the clear tubing attached to the barbed fitting.
4	The Milli-Q System should be in READY Mode.	READY 05 Jul 2007 16:53 Steady Elix: 0 12.5 Mpa/cm TC Elix: 1 25.1°C Tank: 1 89.0 %
5	Push the plunger down on the Q-POD Dispenser. In a few minutes, water should dispense from the Q-POD Dispenser.	READY 05 Jul 2007 16:57 Steady Elix: 0 12.5 Mpa/cm TC Elix: 1 25.1°C Tank: 1 89.0 %
6	Dispense water for about 10 minutes. This flushes out any trapped air in most of the Milli-Q System. This also rinses off the purification media located in the Quantum Cartridge.	READY 05 Jul 2007 16:44 Steady Elix: 0 12.5 Mpa/cm TC Elix: 1 25.1°C Tank: 1 85.0%
